

**PROJECT FULL TITLE:**  
**COORDINATION AND COLLABORATION BETWEEN REFERENCE COLLECTIONS OF  
PLANT PESTS AND  
DISEASES FOR EU PLANT HEALTH POLICY**

**GRANT AGREEMENT NO.: (612712)**

Workpackage : WP4. Access  
Deliverable : Deliverable Nr DL4.1: Questionnaire for collections, about their stakeholders and access, linked to questionnaire set up in task 2.2 (month 12)  
Date : Date deliverable 27th September 2014  
Partner responsible : Partner 9 Perrine Portier (INRA) – Partner 8 Pascal Gentit (ANSES)

The main target of this work is to summarize knowledge of the biological resources available (what is where and how from WP2) and of the stakeholders needs (who need what, in which format and why) and how material can be deposited.

The main target of this deliverable was to design a questionnaire for collections to be linked to WP2 questionnaire (Task 2.2) in order to assess:

- Who are their stakeholders and what they ask for (what are their needs) to collections;
- How access to the biological resources is organized inside the collections.

WP4 worked with WP2 to add 2 questions to the questionnaire:

23 – Who are the customers of your collection?

24 – What are they most interested in?

Moreover WP4 is highly interested in the following questions:

7 – Does your institute / laboratory have an ordering process ?

8 – Does your institute / laboratory have a Material Transfer Agreement (MTA)?

The questionnaire was sent within Europe and EPPO countries to NPPOs and institutions, universities and other parties, which uses phytosanitary important organisms from collections. The data are now being analyzed. The results will be gathered and presented on the Q-Collect meeting in November.
