

PROJECT FULL TITLE:
**COORDINATION AND COLLABORATION BETWEEN REFERENCE COLLECTIONS OF
PLANT PESTS AND
DISEASES FOR EU PLANT HEALTH POLICY**

GRANT AGREEMENT NO.: (612712)

Workpackage: WP6. Sustainable European network of reference collections
Deliverable: DL6.3: Process description/ flow chart application defined criteria
Date: 24.09.2015
Partner responsible: Partner 12 (Ages) – Partner 4 (UGent)

Content

No table of contents entries found.All Annexes are included in deliverable 6.1 of Q-collect

Executive summary

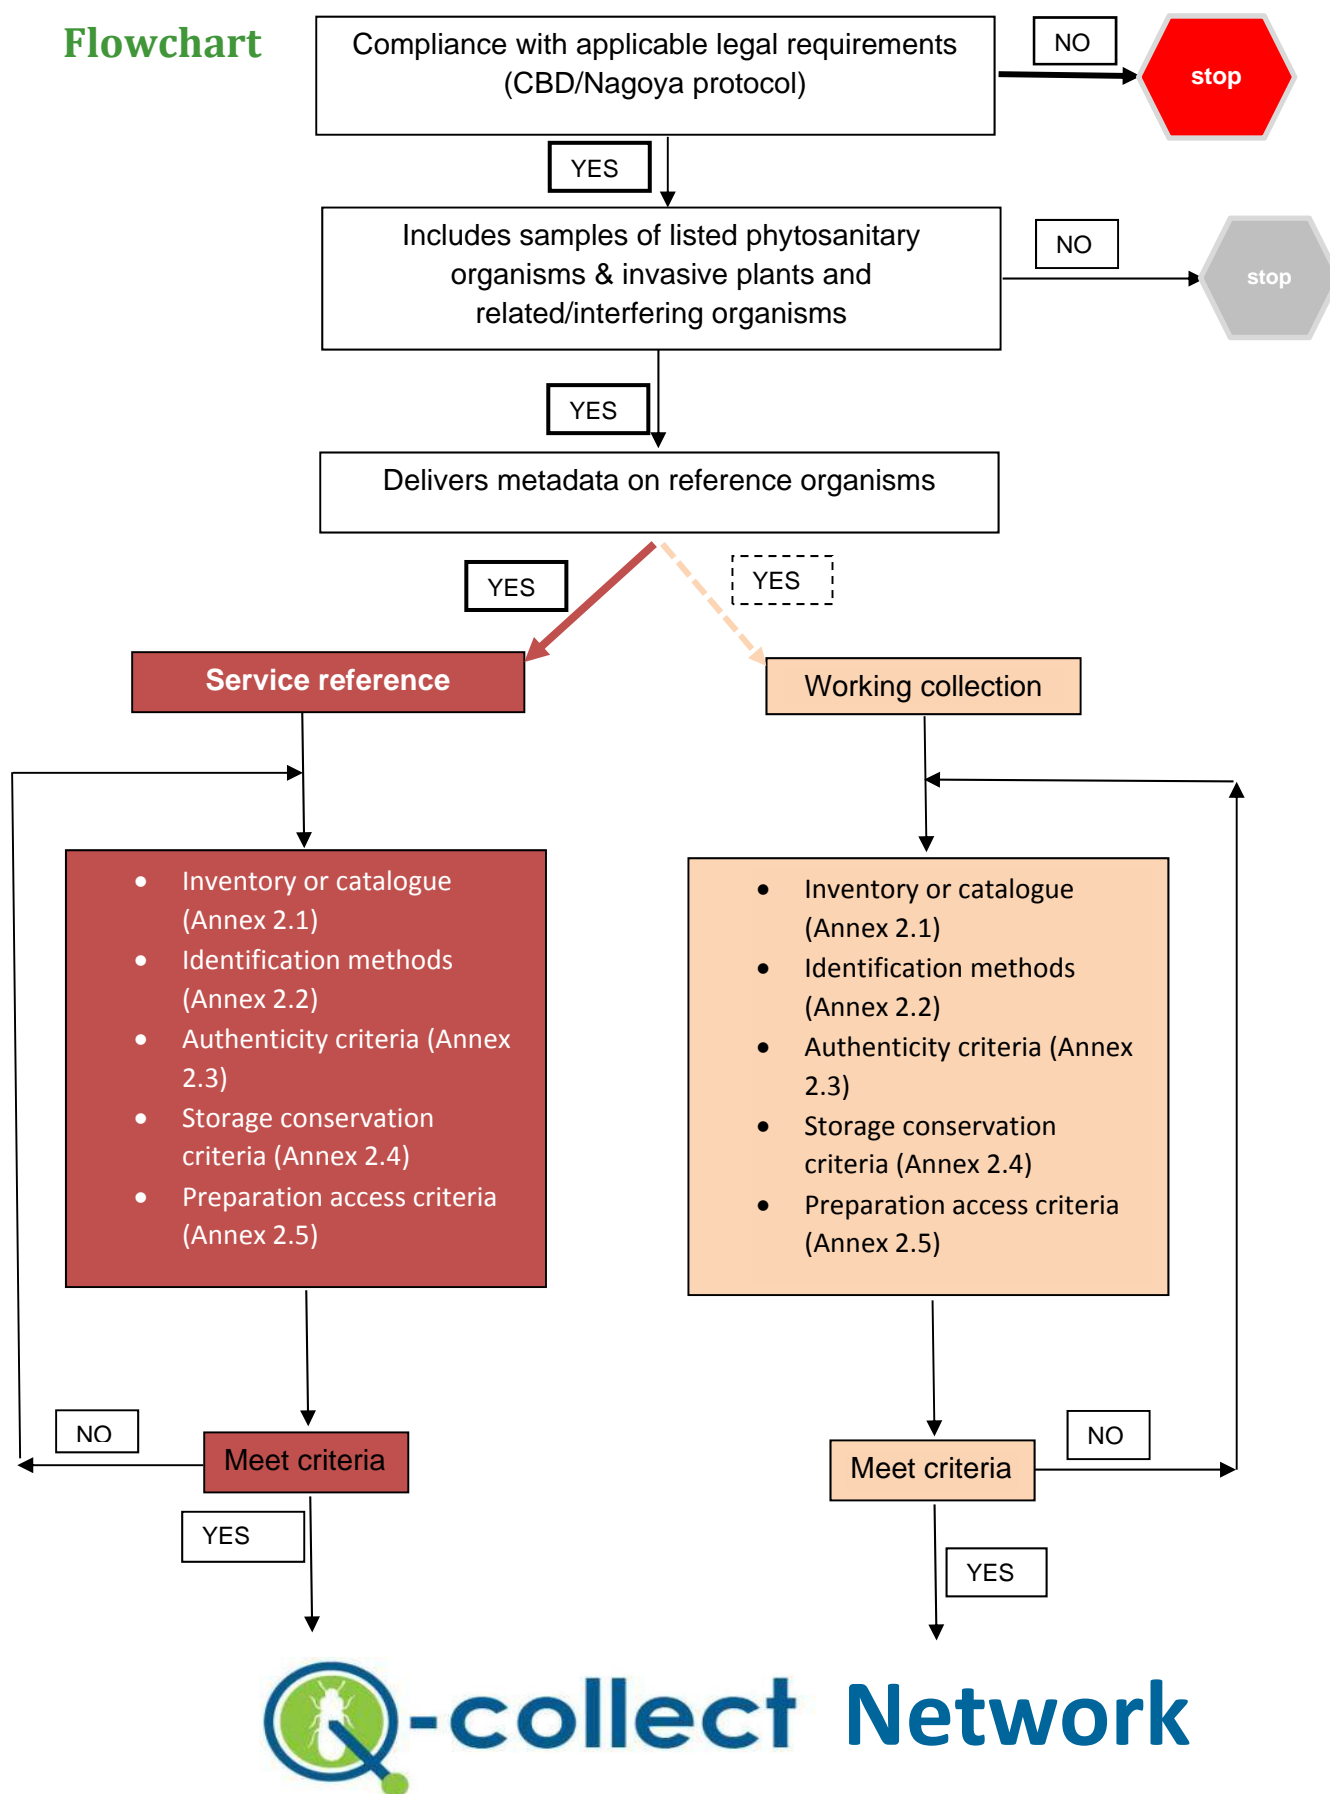

This document focusses on the process description for the application of the developed and defined reference criteria for a sustainable network of European reference collections of plant health quarantine organisms and lookalikes. The process is visualised in a flow chart taking into consideration the feasibility and practicability of the different process steps.

Therefore one flowchart was produced including:

- both the establishment and the maintenance of the network
- both types of collections (service reference collections and working collections)
- the general network criteria with reference to the specific network criteria in separate annexes

The proposed reference criteria shall not exclude collections based on current standards and activities from a future Q-Collect network, but shall encourage all collections to participate in the adaptation of their standards with regard to improved harmonization of quality and reference criteria.
